

# Portfolio Optimisation:

## Do the right work at the right time

### Scenario Planning

#### What is the Scenario Planning?

A strategic planning tool where initiatives are evaluated through the lens of various scenarios to assess potential impacts to the initiative and other initiatives in the portfolio.

#### Why use it?

Each initiative is evaluated and considered in the context of what could emerge during delivery.

#### How do you use it?

During your planning sessions look at all the initiatives align on what issues may impact them.

Analyse the external factors, market trends, and potential disruptions that could significantly impact your portfolio's performance and budget requirements.

Develop contingency plans and trigger points to quickly adapt your budget and reallocate resources as the situation evolves.

#### Keep Going!

Every time a new initiative is identified, assess it through the Scenario Planning Lens then work on it as indicated.

#### Pro Tips:

Use this technique to create alignment with all senior Stakeholders. This addresses the emerging issues that can drive your Delivery Portfolio in the wrong direction
